ANUJ PAL

Meerut, Uttar Pradesh, India | sout.anujpal@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science (AI & ML) student at AKTU, graduating in August 2027. Built and deployed CodeSense, a production-grade DSA learning platform (Java, Spring Boot, Docker, Azure, CI/CD), and a full-stack e-commerce platform for a freelance client (Spring Boot, Next.js, PostgreSQL, Razorpay). Experience with REST APIs, Hibernate/JPA, OOP, and SOLID principles. Seeking a Java Backend Developer, SDE Intern, or Full Stack role.

EDUCATION

Dr. APJ Abdul Kalam Technical University (AKTU), Uttar Pradesh, India

B.Tech in Computer Science - AI & ML | CGPA: 7.0 / 10.0 Aug 2023 - Aug 2027

Academics: Class X - 65%, Class XII - 75%, UG - CGPA - 7.0/10 (70%)

TECHNICAL SKILLS

- **Languages:** Java (Primary), Python, SQL, JavaScript
- **Backend:** Spring Boot, Spring MVC, REST APIs, Hibernate/JPA, Maven
- **Databases:** PostgreSQL, MySQL
- **Cloud & DevOps:** Docker, Azure VM, Vercel, AWS EC2, GitHub Actions (CI/CD)
- **Concepts:** OOP, SOLID Principles, Data Structures & Algorithms, DBMS, Operating Systems, SDLC, System Design Basics
- **Tools:** Git, GitHub, Postman, IntelliJ IDEA, VS Code

PROJECTS

CodeSense | Java, Spring Boot, Docker, Azure, PostgreSQL, LLM API | Live Demo JUN-2026

- Built and deployed a DSA learning platform that runs Java and Python code and replays execution step by step to understand the algorithm's flow.
- Traced real execution using JDI (Java) and sys.settrace (Python), rendering both using a common trace format.
- Sandboxed user code in Docker with memory, CPU, and network limits and added rate limiting and input validation.
- Integrated LLM-based code review (pattern and complexity analysis) through a provider-agnostic LLM API with rule-based checks.
- Automated build and deployment using GitHub Actions to Azure and Vercel.

E-Commerce Platform (Freelance Client Project) | Java, Spring Boot, Next.js, PostgreSQL, REST APIs SEP-2026

- Built a full-stack, single-vendor e-commerce platform with REST API endpoints, JWT-based authentication, and role-based access control.
- Ensured correctness under concurrency using optimistic locking and atomic conditional update operations to prevent overselling and duplicate orders.
- Eliminated N+1 query patterns across product and order listings to reduce database load.
- Integrated PayU and cash-on-delivery payments with server-to-server callback verification and tested the backend using JUnit/Mockito tests run via GitHub Actions CI.

INTERNSHIPS

AI-ML Virtual Intern | Remote Jan 2025 – Mar 2025*AICTE – EduSkills, Supported by Google for Developers*

- Completed a 10-week AI-ML virtual internship under AICTE's National Internship Portal, gaining hands-on experience with AI/ML tools and processes.

Full Stack Web Development Intern | Remote 2025 – 2026

Edunet Foundation, EY & AICTE

- Completed the Student Development Program on Full Stack Web Development with AI Tools, under the Next Gen Employability Program.

CERTIFICATIONS

- HackerRank — Orchestrate: Building & Deploying an AI Agent — Rank #87 / 3,062 (September 2026)
- Coursera — Fundamentals of Java Programming, Board Infinity (2025)
- HackerRank — Java (Basic), Problem Solving (Basic), SQL (Basic)
- MongoDB — MongoDB Basics for Students (2025)
